DETAILED ACTION

Response to Amendment

The examiner acknowledges the amending of claim 1.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 is believed to be allowable as an RF excited gas laser comprising all of the stated structural limitations (as these elements were previously found to be taught by Sukhman US 5894493, see Final office action paper no.11252005) and additionally the limitation that no additional heat-sink is in mechanical contact (taken to mean either making direct physical contact with the laser tube, or to be secured via a simple attachment means) with the laser tube was not found to be taught in the prior art. Sukhman '493 was found to teach the limitations of claim 1 with the exception that heat-sinks were taught to be contacting the laser tube (fig.7 #161/162). In addition, another Sukhman (US 5901167) reference was found that taught a heat-sink which was not necessarily physically contacting the laser tube, but is believed to be in "mechanical" contact as it is secured to the laser tube via a bracket and screw system (fig.2). As no other prior art references were found to teach similar structural limitations of claim 1 and to provide motivation for having no heat-sinks mechanically contacting the laser tube, the present invention is believed to differ from the prior art and be in condition for allowance.

Claims 2-8 are allowable as they depend from allowable claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
